

Deterministic synthetic preprocessing example

Fixed-seed synthetic image and settings from the shipped minimal preprocessing example; processed by the RingSentry core

Seed: 20260730 | Shipped example: examples/minimal_preprocessing.py
Raw: 128×128 , float32, finite 16,384/16,384
Processed: 64×64 , float32, finite 4,096/4,096
QC findings: none; review_required=false
Processing: background offset 35 $\rightarrow$ percentile clipping 0.5–99.5 $\rightarrow$
negative clipping $\rightarrow$ 2 $\times$ block mean $\rightarrow$ log1p $\rightarrow$ min–max normalization
